

Crystal L. Harris

BCF Presidential Advisor

I am a native of Atlanta, Georgia and a graduate of Tuskegee University with a Bachelor of Science degree. I hold a private pilot's license and work as an Engineer with The Boeing Company.

I envision the Bessie Coleman Foundation continuing the legacy of Queen Bess through community and industry based initiatives. BCF is committed to increase the number minority women in aviation thru various resources, thereby ensuring that the Queen Bess Legacy continues.

BCF is also committed to the initiating and/or sustaining community and industry based mentoring programs, flight training initiatives, and scholarship recognition thru the network of aviation related organizations and corporations.

My challenge is to assist in ensuring that the ideals and mission of BCF are cohesive with the dynamic phases of industry needs.
